'natural' landscape you may ask yourself *which is the

'Living with the machine ', maybe as an homage to the  
now defunct love affair of the modern project with the  
machine ? Maybe , maybe not.  
Without doubt the machines, if that is the right word, we  
now rely on pursue a trajectory of ever faster and smaller  
and without doubt as Bucky so presciently observed  
about all late 20c. technology .they all lie outside the  
visible spectrum ?.

Not so much invisible but requiring a device to be made  
see-able ? Bucky thought this was a problem for the  
architect , we are conceited enough to say he was wrong  
, it is merely an opportunity to explore the landscape of  
.....

Can we imagine a section of the metropolis that indicates /locates aspects of invisibility so we can make a new map of the city you cannot see ??
